Subject: Project Status
Harold Hall Property
Jamestown, North Carolina

Dear Ms. Rintoul:

On January 12, 1994, Mrs. Martha Hall and I met with Mr. George Matthis and Ms. Ruth Strauss to discuss the status of the Harold Hall property in regards to trust fund eligibility. The following is a list of some of the facts that were discussed at this meeting.

-- Mid-State Oil Company was the operator of the UST systems from 1982 until 1992 when the USTs were closed.

-- Regarding the diesel release from the 4,000 gallon UST, Harold Hall had only used this tank for gasoline storage and diesel fuel was not stored in this UST until Mid-State Oil Company operated the system.

-- Mid-State Oil Company performed various clean-up activities in response to the diesel release but, Mr. Hall was not informed of the results of the clean-up activity.

During our meeting we also discussed who would be considered the responsible party and for which of the releases. Our meeting concluded without resolving these issues. I have sent a copy of the CSA to Mr. Matthis in order to assist him in resolving these questions.

Geonetics is currently contracted to perform the assessment and future remediation at this site on a co-payment basis with Mr. and Mrs. Hall. Future

work on the project has been postponed until the matter of responsible parties and the trust fund status for this project is determined.

If I can be of assistance in resolving these questions, please contact me at 704-265-1577.

Sincerely,

A handwritten signature in black ink, appearing to read "Keith C. Seramur", with a long horizontal flourish extending to the right.

Keith C. Seramur, P.G.
Senior Geologist

cc: Mr. and Mrs. Harold Hall
